#### DETAILED ACTION

The following office action is in response to newly filed application on August 1, 2006. Claims 1-20 are pending.

# Specification

1. The abstract of the disclosure is objected to as the abstract is to be submitted on a separate sheet alone. Applicant has submitted the abstract as the first page of the WO 2005/076062 instead of alone on a separate sheet. Correction is required. See MPEP § 608.01(b).

## Information Disclosure Statement

The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the

Application/Control Number: 10/597,601 Page 3

Art Unit: 2629

requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 2-18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 2-10, 14, 15 and 20 teach the limitation of "substantially". The term "substantially" renders the claims indefinite as it is unclear whether the limitation is accomplished or not. Appropriate correction is required.

With respect to claims 11-13, 16-18 are also rendered indefinite as they depend upon claims which are indefinite.

### Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/597,601

Art Unit: 2629

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Page 4

6. Claims 1 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Machida et al (US PG Pub 2004/0252361).

As to independent claim 1, Machida et al teach an electrophoretic display panel (Fig. 1) for displaying a picture and subsequently displaying a subsequent picture comprising a pixel (paragraph 0013) having an electrophoretic medium (L. fluid medium) comprising first and second charged particles (4 & 5), the first charged particles having a first optical property (4, of a certain color), the second charged particles having a second optical property (5, of a different color that 4) different from the first optical property, the first and the second charged particles being able to occupy positions in a common region of the pixel (the area between 1 and 6 is the common region), an optical state depending on the positions of the particles in the common region (paragraphs 0079-0081), and transition control means being able to control a transition of at least a first number of the first particles and at least a second number of the second particles being in separate regions in the common region for displaying the picture to separate regions in the common region for displaying the subsequent picture (paragraphs 0079-0087), characterized in that, the transition control means are further able to control the first number of the first particles and the second number of the second particles to be in separate regions in the common region during the transition (Figs. 2-6, paragraphs 0079-0087).

Art Unit: 2629

As to independent claim 19, this claim differ from claims 1, above only in that claim 19 is a method, whereas claim 1 is directed to an apparatus or device. Thus method claim 19 is analyzed as previously discussed with respect to apparatus/device claims 1, above.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SRILAKSHMI K. KUMAR whose telephone number is (571)272-7769. The examiner can normally be reached on 7:00 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sue Lefkowitz can be reached on 571 272 3638. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
